

## Customized RGV Rail Guided Vehicle 0~160m/Min Speed Variable Frequency Control

### Basic Information

### Product Specification

- Dimension: Customized
- Speed: 0~160m/min
- Motion Efficiency: 0~60pallet/hour/set
- Positioning Accuracy:  $\pm 5$ mm
- Operation Mode: Manual, Stand-alone Automatic And Synchronized Automatic Control
- Horizontal Motion Speed Control: Variable Frequency Control
- Highlight: Customized RGV Vehicle, Customized Rail Guided Vehicle, 160m/min Rail Guided Vehicle

## Product Description

### Description

RGV, is known as Rail Guided Vehicle, because RGV can reciprocate and shuttle on a pre-set right-angle track. RGV can realize material handling in multiple and different stations. It is one of the carriers for an intelligent production line and has the characteristics of heavy load, fast running speed, strong flexibility with stable and reliable system, safety protection. Introducing 5G technology for multiple standard AGV reliable synchronization to meet various non-standard application.

Power	motor and reducer
Rayload	100KG-10000KG
Power Supply	isolated conductor rail(ICR), lithium battery
Rail	aluminum alloy or steel, built-in ICR for safety assurance
